

# Stealth Acoustics B1630

Invisible In-Wall Subwoofer Panel

Today, audio and video systems are a large element in the construction of new homes. The result can be an ever growing number of speaker grilles, boxes and hardware that compete with the decor of the living space. Stealth Acoustics is dedicated to making it all disappear. For whole house audio or surround sound, the Stealth Acoustics products offer a cost effective alternative. We call it "The End of Esthetic Pollution".
